

Identifying & Resolving IT Threats

WEBINAR – ON DEMAND WEB LINK & FREE CD ROM

Thursday, August 19, 2010

12 - 1:30 pm P
1 - 2:30 pm M
2 - 3:30 pm C
3 - 4:30 pm E

Resolving IT threats requires an effective risk mitigation strategy.

Bank customer and financial information continue to be at risk, identity theft remains a significant problem, and demonstrating compliance through a successful Information Technology examination can prove quite a challenge. Identifying IT threats involves a comprehensive IT risk assessment that considers threats from both insiders and outsiders, as well as your Information Security Program, which documents the controls management has established to mitigate the risks/threats to an acceptable level.

This webinar will provide a comprehensive framework to understand and categorize IT threats. Learn an innovative approach to perform a gap analysis of where your bank is, versus where it should be. The speaker will demonstrate how an effective risk assessment looks, and how the decisions made during the process should be documented into your bank's Information Security Program, including risk assessment, asset management, business continuity, pandemic preparedness, penetration testing, vulnerability assessment, and IT audit.

Continuing Education: Attendance verification for CE credits provided upon request.

HIGHLIGHTS

- Step-by-step process to identify and resolve IT threats
- Insider and outsider threats
- Evolving and emerging threats
- Performing a gap analysis
- Conducting an IT risk assessment
- Documenting a comprehensive information security program
